## How to read our product code:

Example PM240 110/24

**PM240** = Family code

**110** = input voltage code 110

**24** = Output voltage 24V

## Features

- Overvoltage protection OVP**  
The output voltage is limited to 15% over nominal output voltage by an extra regulation circuit.
- Extra output with series diode**  
Use the series diode output when the output is connected in parallel with other power supplies to archive redundancy.
- Over / Under voltage alarm**  
The built in relay changes to alarm state if the converter output voltage is not within 90% to 115% of nominal output.  
The user can select NO or NC relay funktion. The relay rating is 30V 0.5A (d.c. or a.c.)

## Optional Features

- Inrush current limit with NTC**  
Reduces the inrush current during start up. The input voltage range will be affected. Only available on 110 & 220 input code.
- Conformally coating**  
For environment with high non condensing humidity max 98% RH.
- +70°C operating temperature**  
Contact factory for derating as it depends on model. The alarm can not be used at +70°C.
- Mounting brackets L214-1**  
Se figure 3.
- 19" Rack mounting set PL88-2**  
To mount two PM240 together to form a full 19" rack unit, see figure 2.
- 19" Rack mounting bracket PL88-3**  
To mount one PM240 to form a full 19" rack unit, see figure 2.
- EN/IEC61000-4-5 level 4**  
External varistor + surge arrestor mounted from pole to ground. With this filter the input meets level 4 of EN/IEC61000-4-5 (+/-2kV line to line, 4kV line to ground)
- DIN-rail clips**  
Clips to mount PM240 on a 35mm DIN-rail. Used with PL88-1 & L214 see figure 3.
- Train input**  
Input voltage range according to train standard EN50155 and IEC60571.
