AC = input voltage code AC

24 = Output voltage 24V

## Features

- **Conformal coating**

PSE100 is conformal coated to withstand non condensing tropical environment Rh 95%.

- **Voltage adjust**

Voltage adjustment and output voltage measurement accesable from frontpanel.

- **DC ON LED**

The green LED is on when the output >90% of nominal output.

## Optional Features

- **Ovvervoltage protection OVP-A**

The output voltage is limited to 15% over nominal output voltage. A thyristor short-circuits the output.

- **Built in series diode -C**

A series diode on the output, which is mounted inside the case. Use this option when output is connected in parallel with other power supplies to achieve redundancy. The output power might be derated. It's model dependent, please contact factory.

- **Remote sense -S**

The voltage sensing can be put at the load to compensate for voltage drop. Is a standard feature on 5V output. The sense can compensate for voltage drops up to 5% of the nominal voltage.

- **2.5 kV.a.c. isolation Output/case -E2**

The emission level increase to level A.

- **8 TE Euro panel -L**, see figure 4

- **Wall mounting panels -N**, see figure 3 and 5  
Including connector holder.

- **H15 Screw type female-H15-S**

- **H15 FastOn 6.3mm female -H15-T**

- **DIN rail TS35 clips -Q**
